

Proactive Enterprise Application Management: PLM in Oracle Agile.

You need a secure and collaborative development environment that connects your entire global ecosystem, and establishes a single source of the truth for product information and processes. With **Oracle's Agile PLM** – an easy-to-use product lifecycle management solution – you can accelerate time-to-market, reduce costs, and increase profitability.

Eccellent Solutions can help you in your efforts to improve your product development capabilities and realize the full potential of PLM technology. Our recommended approach combines process and technology improvements with the Agile PLM implementation. Our proven PLM selection and implementation methodology focuses on identifying and applying the right tools to accelerate productivity in your product development efforts from concept to delivery, and back.

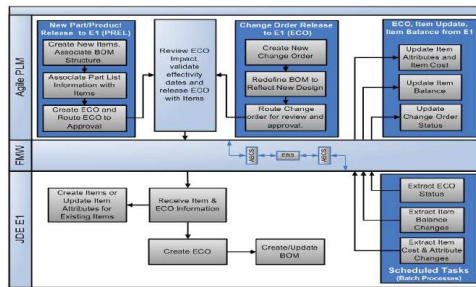

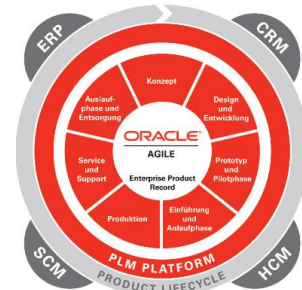

Eccellent Solutions Supports PLM Solutions across the Oracle Agile Platform, including ERP and other system integration, data migration, and infrastructure support.

The Oracle Agile PLM solution features the following benefits:

- ✓ Configurable Stage-Gate model
- ✓ User-defined portfolio management and analytics
- ✓ Configurable activity and project templates
- ✓ Ideation management integrated into new product development and product introduction processes
- ✓ User-defined metrics with integration to MS Office tools.

Enterprise Product Record

Consolidate all product information into a single source of truth that provides organizational clarity on product data and processes, increases productivity, and secures access to product data with configurable roles and privileges

Change Management

Easily and systematically create and approve product changes with greater productivity and efficiency.

Social Collaboration

Unlock the value of your ecosystem's collective intelligence with rich social collaboration capabilities.

Visualization and CAD Integration

Enable visual decision-making and CAD integration across the product lifecycle—without jeopardizing IP.

Launch productivity and cost saving initiatives.
