

# Proactive Enterprise Application Management: PLM in Siemens Teamcenter

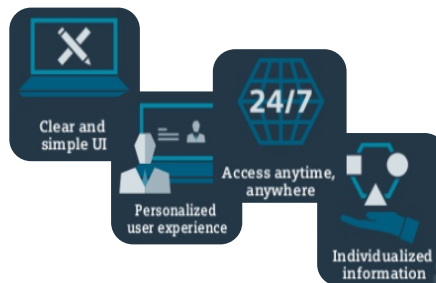

In a world of smart, connected products, where entire markets can vanish with a single innovation, manufacturers must take a new approach to business... And Manufacturing is Vital! To help you activate digitalization, Siemens is building a “Smart Innovation Portfolio” that, quite simply, delivers!

At *Eccellent Solutions* we use our knowledge and experience to coordinate your requirements with the options available in Teamcenter, recommend the best introduction strategy for your organization, and take implementation responsibility.

We work with you to evaluate the strategic added value of Teamcenter for your individual processes, and identify the tools best suit your requirements. Then we implement the system so you see the benefits as quickly as possible.

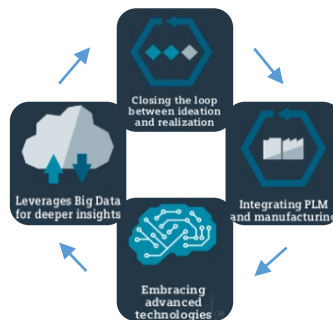

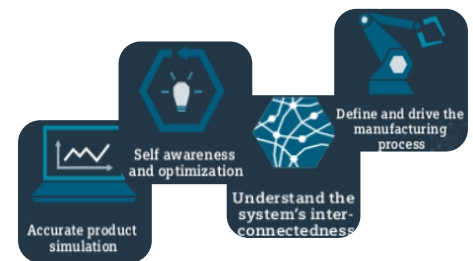

- ✓ A Competent consultancy for the introduction of Teamcenter PLM
- ✓ Requirements coordination and implementation across CAD/CAM integration, change and release processes, project management, support of requirements and compliance processes, continuous 3D visualization, and much more...
- ✓ Analysis and documentation of data and process models
- ✓ Teamcenter customizations to meet your organization-specific requirements.
- ✓ Cross-system integration of data and information flow (PLM / ERP / MES / CRM, and multi-CAD)
- ✓ The seamless integration into your production environment

## Engaged Users

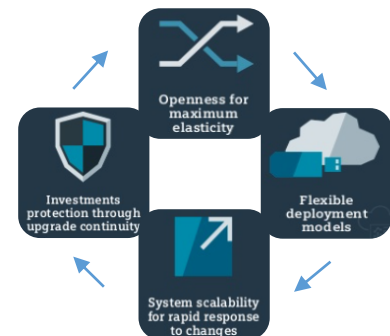

who receive the right information at the right time – by transforming information so that only what’s relevant is delivered in a context suited to each person’s role

**Intelligent Models**  
that evolve throughout the process with the information necessary to optimize themselves for how they need to be built and how they should perform

**An Adaptive System**  
that helps you efficiently deploy solutions today, while maintaining future flexibility

**Realized Product**  
that achieve business goals through the integration of virtual product definition and real production execution

*Eccellent Solutions* can help you in your efforts to improve your product development capabilities and realize the full potential of PLM technology. Our recommended approach combines process and technology improvements with the implementation of the Teamcenter PLM solution. Our proven implementation methodology focuses on identifying and applying the right tools to accelerate productivity in your product development efforts: from concept to delivery, and back.
